

FOR IMMEDIATE RELEASE**MEDIA RELEASE****January 10, 2025****Tosibox Opens U.S. Headquarters In North Texas**

Oulu, Finland / Irving, Texas --- Tosibox, a global leader in Operational Technology (OT) cybersecurity and network automation solutions, is pleased to announce the opening of a new office in Irving, Texas. This expansion strengthens Tosibox's North American presence and reinforces its commitment to providing cutting-edge cybersecurity and connectivity solutions to its growing client base in the United States and beyond.

Located in the Dallas-Fort Worth metropolitan area, Tosibox's new Irving office will serve as a hub for the company's U.S. operations, supporting its continued growth and innovation in OT cybersecurity area. The Irving office will also enhance Tosibox's ability to provide local support, increase speed of service, and deepen relationships with existing and prospective customers and partners across North America.

"Tosibox is excited to expand our U.S. footprint to the Dallas-Fort Worth area, a thriving tech and business center with a highly skilled workforce and vibrant innovation ecosystem," said Sakari Suhonen, Group CEO of Tosibox. "This move enables us to be closer to many of our key clients and partners, strengthening our ability to deliver solutions that drive digital transformation, enhance security, and simplify connectivity for enterprises across diverse industries."

Tosibox's patented technology, known for its simplicity, reliability, and security, has garnered significant traction worldwide as companies increasingly seek to manage their operations remotely and protect critical infrastructure. With its solutions, Tosibox enables cybersecure OT network to industrial systems, connecting thousands of devices across global networks with a high degree of automation and minimal setup time.

The new office reflects Tosibox's continued investment in providing a world-class customer experience and adapting to the evolving needs of businesses in the U.S. market. It also supports Tosibox's plans to expand its U.S.-based workforce, tapping into local talent to drive further innovation in OT cybersecurity solutions.
